

# GRANTMAKING 2023 FACT SHEET

**In 2023, the Agroecology Fund granted a total of \$5,432,243 through 152 grants for implementation in 61 countries.**

Out of the 81 medium-term grants (for implementation up to 24 months) awarded by the global grant program and regional funds, 34 are renewals and 47 are grants to new collaboratives. The Grant Program reaches much of the world, but in 2023 the top five countries to receive grants are Mexico, India, Uganda, Kenya, and Democratic Republic of Congo. The top five countries to receive funding are Mexico, India, Kenya and USA. A key aspect of the grantmaking strategy is to ensure that the grant portfolio includes initiatives led by Women, Indigenous Peoples and Youth. In 2023, initiatives led by these constituencies received 30% of the grants.

**In 2023, the Agroecology Fund granted \$4.6 million globally and the regional funds awarded \$772 thousand in grants in Mexico and India.**

- Medium-term grants are the main grant category and should be implemented in a period of 12 to 24 months.
- Special grants include small-grants to current grantees for developing Business Plan (only for Africa) and documenting cases as part of the Grassroots Evidence for Agroecology (GEA) initiative.
- Small grants correspond to small support to one-off actions.

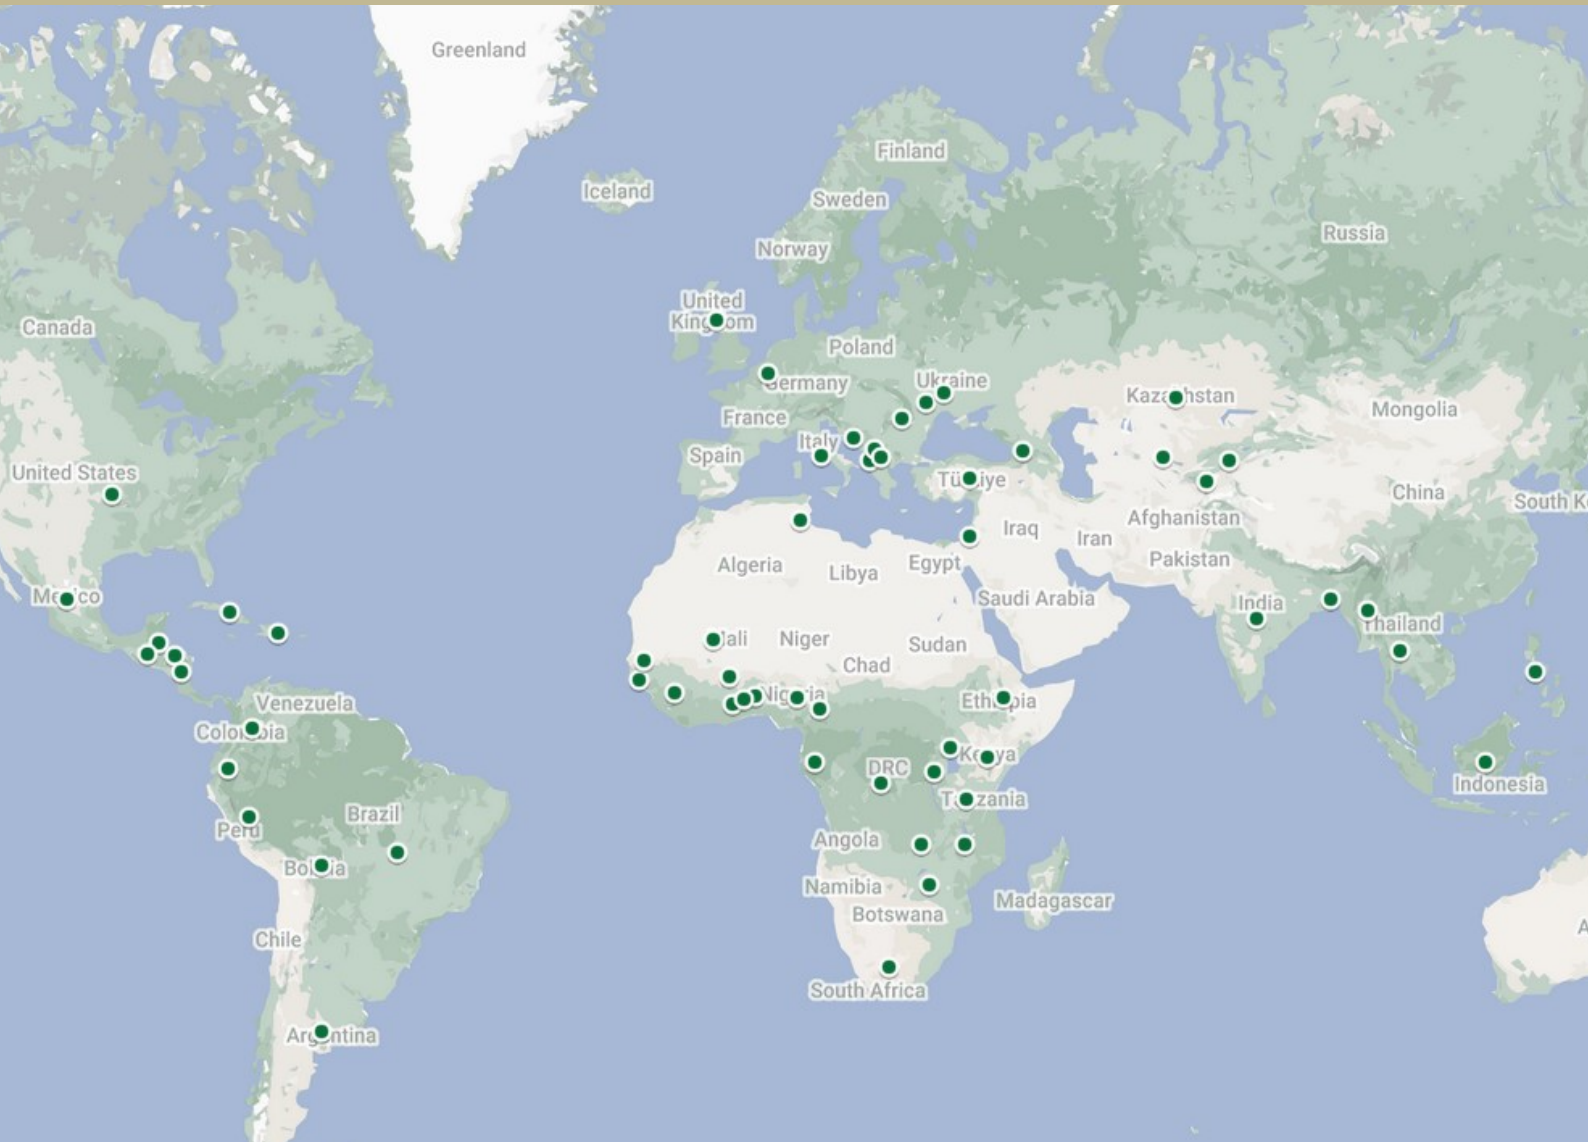

Global Grant Program

Regional Funds

Grant type	# Grants	US\$
Medium-term grants	50	3,912,000
Special Grants	30	299,943
Small grants	41	446,890

Grant type	# Grants	US\$
FAPY (Mexico)	19	350,880
BAF (India)	12	422,530
